

Plan Comparison

Make the internet a safe place for you and your loved ones with a digital security benefit.

While doing more online offers employees great connectivity and convenience, it also puts some of the things that matter to them the most at risk: their identity, money, assets, and reputation. Aura provides employees and their families with a digital security benefit that's **simple** so it's **easy** to stay **safe** online.

The average consumer's digital activity puts them at risk.

10 devices

90 online accounts

6+ hours / day online

Meet Aura, the new standard in digital security.

Traditional identity theft protection solutions focus narrowly on employees' "digital footprints" by providing alerts after their information is exposed by a breach or found on the dark web. These solutions are fragmented, overly technical, and complex — leaving employees confused and giving them a false sense of security.

Aura has redefined digital security. Putting the user at the center of everything we do, we are the only provider that has designed an all-in-one solution to offer protection for financial, credit, identity theft, malware, ransomware, scam sites, and other online threats. We focus on the user experience and features that provide the industry's strongest protection where consumers say they need it the most.

Identity

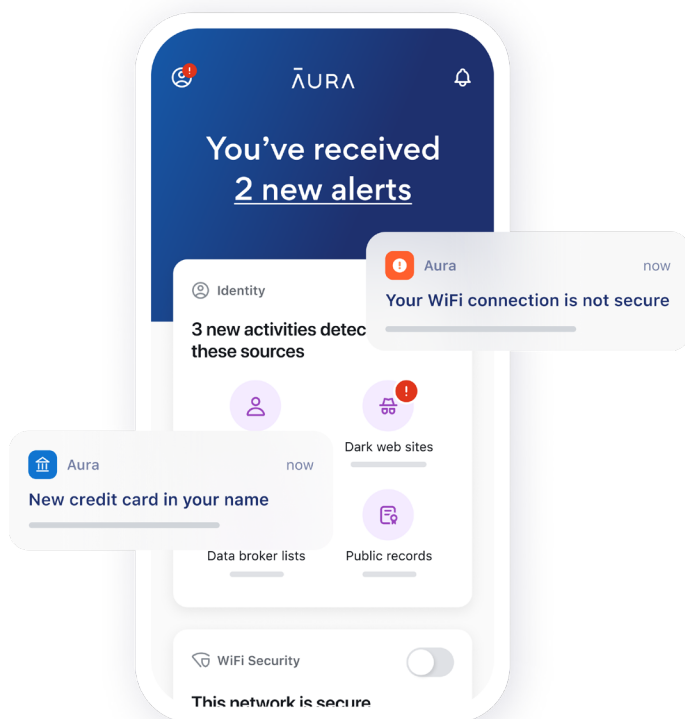

We have the fastest alerts with direct 3 bureau integration and AI-driven technology.

Network/WiFi security

We offer the fastest connection speeds and broadest coverage.

Privacy

We provide automated, proactive list removal and masked data for extra protection.

For more detailed plan information, please refer to the plan certificate of coverage.
